Consulting/Engagement Skills Refresher

Sustain and expand on progress...

Outcomes.... Greater uptake & sustainability of the skills attained on the Consulting/Engagement Skills Workshops. The Consulting/Engagement Skills Workshops have great impact in shifting the mindset of participants, and generating new and improved ways of performing their roles. However it is intensive, too much content to take it all in in one go, too many skills to put into practice after just one sitting. This refresher is designed to help participants sustain the change of behaviour that they have implemented, and then pick up on some of the items they missed or have not yet got around to. The investment in one additional day can double the value attained during the initial 3 days.

Audience.... Participants of the Consulting/Engagement Skills Workshops, 6 - 24 months on.

Workshop elements....

The key to the workshop is; refresher with out repetition. The event revisits key frameworks (Engagement and Personality Styles) yet with a different application (team working). The major part of the day is experiential in nature - participants working in teams to produce a short film to promote techniques from the workshop (see also "Makin' Movies").

Duration.... The workshop is a 1 day event.
